

HOOPLA Parental Controls

Here is a “how-to” guide for Hoopla. The parental control instructions and a summary are described below. Create a no-cost Hoopla account using your PPLD library card number and PIN.

What is Kids Mode?

Hoopla Kids Mode is a multi-format digital media experience designed especially for kids (up to age 12). All content – movies, TV shows, music, audiobooks, eBooks, and comics – has been curated by Hoopla and brought together in this one family-friendly place.

Kids Mode is a feature that should be used with parental guidance. Parents or guardians are expected to decide whether a specific title is appropriate for their child.

How to Use Kids Mode:

To use Kids Mode, log into your Hoopla account and tap or click the **KIDS** icon at the top right of the page. This will direct you to the **Settings** page, where you can choose to either “**require a PIN to unlock Kids Mode**” or “**turn it on without a PIN.**”

The PIN can be any combination of four digits. Each device you use must be set up individually to require a PIN, but the PIN does not need to be unique for each device. If you “forget your PIN,” tap the **Forgot your PIN?** link, and you will receive your PIN in an email.
