**II. Scope of the Project**

A. **Sand Creek Library Makerspace Project Overview:**

   Pikes Peak Library District (PPLD) is a nationally recognized system of public libraries serving a population of more than 619,000 in El Paso County, Colorado. PPLD's fourteen facilities, online resources, and mobile library service make it a vital force for individual and community transformation. PPLD has an employee base of 481 full and part-time staff, and utilizes roughly 1,500 volunteers. It strives to reach all members of the community, providing free and equitable access to information and an avenue for personal and community enrichment. PPLD is recognized for its commitment to diversity and community collaboration, its quality programming, and its excellent customer service.

   PPLD is the second largest library district in the state of Colorado and regularly places in the top tier of national library rankings. PPLD serves a 2,000 mile service area in El Paso County, including all unincorporated areas and cities of Colorado Springs, Fountain, Monument, Palmer Lake, and Calhan.

   Planned Public spaces include creation of an interactive Makerspace, relocation of the existing quiet reading area, and teen area as well as a small study room. The Makerspace will also be a place for local creators to 1) network and collaborate; and 2) showcase their work.

   PPLD makerspaces are being established to promote creativity, ingenuity, and entrepreneurship. These spaces support lifelong learning and realization of ideas in a new way through technology and hands-on fabrication using 3-D printers, laser cutters among other equipment.

   The Sand Creek makerspace will also include a recording studio equipped with a computer equipped with a current Digital Audio Workstation (DAW), multitrack mixing-board/interface monitors (speakers) for playback and mixing, acoustic room treatment material, isolation headphones, instrument, speaker, and XLR microphone cables, microphone stands, microphones for recording voice, instrument, ensemble or drums.
Focus Group: PPLD’s goal is to be relevant and responsive to the community. A focus group will be held in the early planning phases to get community feedback.

Flexibility of Use: A flexible, open environment will best meet library needs of the future, with few permanent barriers, furniture, or fixtures. Electrical access should be ubiquitous. Merchandizing should be interesting and plentiful.

Accessible: These spaces shall be accessible to all patrons and meet all current ADA regulations.

Creative Re-Use of Existing FF&E: The budget is limited, and the project encompasses several existing spaces within the Sand Creek Library. The Sand Creek Makerspace will require a significant investment in equipment, hardware, software, and creative work spaces. Team shall also consider the re-use of existing furniture currently located within all affected spaces.

Safety: Safety for both the staff and the public is paramount in our facilities. The affected spaces shall be designed with safety in mind. Visible sightlines within the facility are important for internal security be incorporated into the facility

Ergonomics: Libraries today utilize a plethora of technologies for both staff and public workstations. Design of all spaces must use ergonomically recommended measurements and guidelines.

‘Experience’ Spaces: The layout should accommodate regular and on-the-fly ‘experience’ spaces – quick, interactive opportunities to surprise and delight customers.

Third Place: The ambiance of these spaces should make residents feel that the library is worth leaving their own homes. Spaces should accommodate an interactive experience as well as facilitate independent creativity
The purpose of the Sand Creek Makerspace and Recording Studio will be to encourage creativity, collaboration, and community. NOTE: See Exhibit 1 for possible targeted spaces for this project.

Makerspace
The Makerspace should be designed for both high tech exploring and low tech crafting. The space will be flexible and should easily change with patron use and desires. We would like an open floor plan with mobile workstations. The room should easily transform into a classroom setting or laid out for individual work spaces. The space should accommodate the following activities and/or equipment:

- Laser cutting
- 3-D Printing and 3-D scanning
- Sewing and fabric crafting using sewing machines, sergers, embroidery machines, irons, steamers, and hand sewing techniques.
- Wood burning and soldering
- Coding and robotics
- Small scale pottery/ceramics work with a table top kiln
- Crafting using mobile kitchen equipment (microwave, induction range, toaster oven)
- Jewelry making
- Craft and art exploration using hot glue guns, other adhesives, paints, etc.
- Washer/Dryer

We expect equipment and activity needs to change quickly. The design should allow us to keep the space attractive and relevant.

Recording Studio
The Recording Studio would give patrons access to equipment that would allow them to record, mix, and edit audio. Like the Makerspace, we expect this space to morph with patron use and desires. Our intent is to open with a basic equipment setup and add equipment and resources as needed. The Recording Studio should be thoroughly soundproofed to minimize noise from within the Recording Studio leaking into the library and library noise leaking into the Recording Studio. Desired equipment includes computer equipped with a current Digital Audio Workstation (DAW), multitrack mixing-board/interface monitors (speakers) for playback and mixing, acoustic room treatment material, isolation headphones, instrument, speaker, and XLR microphone cables, microphone stands, microphones for recording voice, instrument, ensemble or drums. We expect equipment needs to change quickly. The design should allow us to keep the space current and relevant.

Depending on the recommendations of the Design/Construction Team, we would also consider Video Production in this space.
