

TAKE AND MAKE: 3D Jellyfish

Ages 5-12

Gather your supplies.

Provided in your bag: a paper bowl, streamers, fishing line, assorted decorative materials (decorative materials vary amongst bags)

From home: glue, markers, tape, other decorative materials (optional)

Step 1.

Color and decorate the outside of your bowl. Make sure to leave room to draw some eyes if your jellyfish needs them!

Step 2.

Cut your streamers in half longways and glue/tape them to the inside rim of your bowl so they are hanging down.

Step 3.

Poke a hole in the middle of your bowl and string your piece of fishing line through it; tape it on the inside so it stays in place.

Step 4.

Hang your jellyfish up (you can use a piece of tape to attach the other end of the fishing line) and enjoy your new, colorful friend! Give them a name too!

ASL

You are making a fun and colorful jellyfish today, so let's learn the ASL sign for **jellyfish**!

Using one hand, wiggle all your fingers. Now move your hand across the front of your body and make it look like a jellyfish is swimming through water. It is that simple!
