

Slime Creatures

Ingredients:

- 1/4 cup Elmer's Liquid Glue
- 1/4 cup water
- 1/4 cup liquid starch
- Food coloring
- Glitter

Make the slime

1. Add 1/4 cup Elmer's Liquid Glue to the bowl
2. Add several drops of food coloring to the glue if desired

3. Use the craft stick to stir the food coloring into the glue until it is completely mixed in

4. Add glitter (if desired)

5. Use the craft stick to stir in the glitter until it is completely mixed in

6. Add 1/4 cup water

7. Use the craft stick to stir in the water until it is completely mixed in. The glue will sort of “dissolve” into the water.

8. Add 1/4 cup liquid starch. The mixture will be very soupy.

9. Use the craft stick to stir the mixture until the liquid starch is completely mixed in. The mixture will start to stick together and stick to the craft stick very quickly.

10. Keep stirring until the mixture is completely mixed together. You might have to pull it off of the craft stick a few times and keep mixing.

11. Once the liquid has been completely mixed into the glue, the slime will be squishy but will hold together. Use your hands to knead it together until it is no longer sticky. It will feel a little wet and will stretch nicely.

16. Use a small tub with a lid or other air tight container to store the slime.

17. After the slime is made, it is time to make creatures!

Creature supplies

- Googly eyes
- Pipe cleaners
- Sequins
- Yarn
- Pom poms
- Straws

18. Use the different craft supplies to make your creature! Imagination is key as you can make it look like anything you want!
